Hello,

Alamo Power District No. 3 was created in 1936 after the Nevada State Legislature passed an act that provided for the creation of power districts. Alamo Power District No. 3 was established under the NRS 318 as a "General Improvement District". Alamo Power District No. 3 is governed by an elected or appointed board of (5) directors under NRS 318.

Alamo Power District gets its energy from Lincoln County Power District who is our energy provider. Alamo Power District No. 3 service territory incorporates the entire Pahranaagat Valley area. The area is about 45 miles long and 5 miles wide. APD3 has approximately 750 meters varying from small residential service to large Commercial & irrigation services. APD3 has one office in Alamo, Nevada which is in Pahranaagat Valley about 100 miles north of Las Vegas.

APD3 has made robust changes in the past few years to enhance system reliability and to transition into the modern world of energy delivery. APD3 will continue to make efforts to provide safe and reliable energy for years to come.

We always welcome questions and are more than willing to sit down with any customers to discuss any concerns they may have. Please feel free to contact us either at our office at 240 Main Street, Alamo, NV 89001 or by phone at 775-725-3335.

Sincerely,

Ken Maxwell

General Manager

-Deposits-

7.1 The meter deposit shall be as follows:

-less than 100 amp. Service:	\$100.00
-100 to 200 amp. Service:	\$300.00
-over 200 amp. Service:	\$500.00
-401 amp and higher Service:	\$1.50 per amp

7.1.1 A meter deposit shall be required for all new active accounts requesting electric service from the District.

7.1.2 A customer with an inactive account for more than 5 years, shall be required to pay a meter deposit.

7.1.3 The largest ampere service at the customer location will set the deposit amount.

7.2 In addition to the meter deposit there will be a non-refundable service fee of \$25.00 for all hook-ups and account transfers.

7.3 Meter deposits will be held for the period of 2 years. There will be no interest paid pursuant to the provisions of N.R.S. 318.

7.3.1 Meter deposits will be refunded after two years on the following conditions:

a) The bills are paid on time and in full at least during the preceding 12 months.

7.3.2 Meter deposits will be refunded in one of the following ways:

a) Deposits will be credited to the active customer account of the District.

b) Deposits will be refunded by check upon termination of the account. Before refunding the deposit, it will be applied to any unpaid balance owed the District and the remaining deposit balance will be refunded.

-Rates-

ALAMO POWER DISTRICT NO. 3

RATE SCHEDULE

ALAMO POWER DISTRICT NO. 3

RATE SCHEDULE

LARGE COMMERCIAL SERVICE

- APPLICABILITY:** Applicable to all customers of the District for service to commercial establishments, industrial, schools, churches, and public buildings. The Customer connected load must be 51 kVA or greater or use more than 10,000 kilowatthours per month. Service shall be subject to the established rules and regulations set forth by the policies of Alamo Power District No. 3.
- TYPE OF SERVICE:** Service shall be provided as single-phase or three phase, 60 hertz, and at the available secondary voltage.
- USE:** Service hereunder shall only be used for intended purposes. Commercial purposes may include, but not limited to, crop processing facilities. Public building purposes may include, but not limited to, municipal wastewater treatment, municipal water treatment, and municipal water pumping. The customer shall not sell the electric power and energy purchased hereunder. The capacity of individual single-phase motors served, may not exceed 10 horsepower.
- RATES:**
- | | |
|------------------------------|---------------------------------------|
| Customer Base Charge: | \$100.00 per meter, per month. |
| Energy Charge Rate: | \$0.07744 per kilowatthour per month. |
| Demand Charge Rate: | \$9.80 per kilowatt per month. |
- MINIMUM CHARGE:** The monthly minimum charge shall be the Customer Base Charge of \$100.00 per meter which shall be assessed regardless of the amount of power and energy consumed by the Customer during the billing period.
- SPECIAL CONDITIONS:** At the sole option of the Alamo Power District No. 3, the Customer may be required to enter into a contract for service under this rate schedule.
- The starting of motors shall be controlled by the Customer to maintain voltage at the point of delivery within acceptable industry standards. Alamo Power district No. 3 shall notify the Customer of any voltage sags or dips exceeding 3% percent, as measured at the point of delivery, and shall meet with the Customer to determine appropriate corrective actions. The cost of corrective actions shall be borne by the Customer.

SPECIAL CONDITIONS: All electric motors with a nameplate rating of 100 horsepower or greater shall require, prior to connection, reduced voltage starting capable of effecting a 50% or greater reduction in the amount of starting amperes.

The Customer shall not install standby or backup generation without prior approval of Alamo Power District No. 3

ALAMO POWER DISTRICT NO. 3

RATE SCHEDULE

PURCHASED POWER ADJUSTMENT RATE

APPLICABILITY:	Applicable to all customers of Alamo Power District No. 3.
PURPOSE:	Rates charged by Alamo Power District No. 3 for electric service are based upon purchased power costs and operational costs to maintain Alamo Power District No. 3's substations and distribution system. The purpose of this Purchased Power Adjustment Rate is to reflect the Purchased Power Adjustment Rate that Alamo Power District No. 3 receives from its power supplier Lincoln County Power District No. 1
IMPLEMENTATION:	The Purchased Power Adjustment Rate shall reflect the PPAR from Lincoln County Power District No. 1 and will match the adjustment period beginning October 1 st and ending September 30 th . This 12- month period of time is referred to as the PPAR period.
RATE FORMULATION:	The Purchased Power Adjustment Rate for each PPAR period shall be determined by the current PPAR formula of Lincoln County Power District No. 1's PPAR schedule. This rate will be assessed to all Alamo Power District No. 3 customers for the PPAR period.
PPAR BILLING	
AMOUNT:	The PPAR Billing Amount shall be determined by multiplying the PPAR by each customer's actual energy purchased, in kilowatthours, during each billing period of the PPAR period.
BILLING:	The PPAR Billing Amount shall be included on each customer's monthly statement for electric service during the PPAR period. Each statement shall show the PPAR, the customer's applicable energy usage, and the PPAR Billing Amount. The PPAR Billing Amount will be a separate line item on each customer's monthly statement.

-Account Payments-

Section 8- Account Payments

8.1- Billing Accounts (Those accounts pertaining to electric service)

8.1.1 Monthly power bills are due and payable upon receipt. All accounts not paid by the 15th of the month will be assessed a late fee.

8.1.2 After the 15th of the month there will be a 5% late penalty added to the current amount. There will also be a 1% interest charge added to past due amounts over 30 days.

8.1.3 Any payment postmarked on or before the 15th of the month or received in the office before the office opens on the next business day after the 15th of the month, will be deemed paid on time.

8.1.4 Payment may be made by cash, check, cashiers' check, money order, online payment portal, or Electronic Funds Transfer.

8.1.5 Any customer who has attempted to provide payment for service with an invalid payment form will be assessed a \$25.00 service charge to cover fees imposed by payment processing entities. The service charge will be in addition to late fees assessed under this policy. Invalid payment forms include returned checks, counterfeit funds, or insufficient funds to cover transactions.

8.2- ARO accounts (Those accounts pertaining to material sales and services)

8.2.1 Invoices are due 30 days after invoice date.

8.2.2 A 5% finance charge will be added after every 30 days of the unpaid balance.

-Delinquent/Disconnection-

Section 11- Delinquent and Disconnect Policy

11.1 All accounts will be due and payable upon receipt. All accounts not paid by the 15th of the month will be assessed a late fee according to section 8.1.2. All accounts not paid in full at the end of the billing cycle, will be considered delinquent and may be subject to termination of service. At the discretion of the District, delinquent accounts may be subject to installation of a current limiting device. If payment is not received by the 15th day of the next month, service may be disconnected. If the 15th day of the next month is a weekend or holiday, the disconnection date would occur on the next business day after the 15th of the month.

11.2 If a customer fails to pay any bill for service when due, the District may disconnect service to the customer after completing the following steps:

11.2.1 All delinquent accounts will receive a written notice requesting payment before the 15th day of the next month. The notice must clearly state that service is pending disconnection. The notice will identify the full amount due, including any penalties assessed, that must be paid by the customer to avoid service disconnection. The notice will also clearly state the date on which disconnection will occur.

11.2.2 If a customer has not paid the amount due or made satisfactory payment arrangements prior to the disconnection date identified in the above-stated notice, then the service will be terminated for non-payment.

11.3 If power is disconnected for non-payment, following the notice, the customer will be required to pay the balance in full, a reconnect fee of \$50.00 and a meter deposit equal to the current policy requirements, before service can be restored. Service will not be restored at that location in any name, until payment in full is received

-Website Details-

www.apd3.energy

In 2021 APD3 updated its software suite and created a website for information and providing online payment options to our customers. We hope to grow this online experience as we investigate the option of “AMI” Automatic Metering Infrastructure. This will better allow you to control your own energy usage. After you login to your account you will have the opportunity to see your current bill, look at history, and make payments to your billing account. You can also sign up for text and email notifications regarding your account. Please check the website for updates of information. To create a profile, you will need to have your billing account and one of your meter numbers. Both can be found on your billing statement.

-Energy Tips-

10 Simple, Eco-Smart Swaps

Switch to premium LED bulbs

They use less energy and last 25 times longer than standard bulbs. Plus, they produce less heat and give off true and natural light.

Savings: Uses 82% less energy than an incandescent

Wiser Window Treatments

Trade your blinds for cellular and honeycomb to help you keep heat in during winter – and out during summer.

Go Low-Flow

Taking a shorter shower is a good move, but a smarter showerhead is an easier switch.

Savings: Up to \$70 a year on your water bill!

Shut the Fridge Door

Know before you go. An open door wastes cool air.

Savings: 7% of your fridge's total energy use!

Aim for 78

Switch to a programmable thermostat and set it to that magic number.

Savings: 40% on cooling costs!

On-Demand Lights

Add a motion sensor to your outdoor fixtures and any less-visited places in your house.

Fix a Drip

A drop per second wastes 192 gallons per month! First, try tightening all. No luck? Replace gaskets and O rings. If all else fails, call the plumber.

Cool It

A typical heater is set to warm household water to 140° F, but 120° F is just fine.

Savings: \$12 to \$30 a year!

A Cold Cycle

Washing clothes in cold water can slash water-heating costs – and don't worry, everything will still get clean.

Savings: Up to \$40 a year!

Power Down

When not in use, electronics still draw electricity. Plug your biggest gadgets into a UL-certified power strip – then flip the switch before bed.

Savings: Up to \$100 on your energy bill annually!

No-Cost Ways to Save Energy

Seasonal Changes: Set your thermostat to 78°F or higher in the summer and 68°F or lower in the winter. Every degree of extra heating or cooling will increase energy usage 3% to 4%.

Ceiling Fans: Ceiling fans can help you feel about 4 degrees cooler. In the summer, fan blades should move counterclockwise to push cool air downward.

HVAC: Open all vents and interior doors when using central air conditioning to optimize the flow of cool air and avoid overworking your HVAC system.

HVAC Vents: Move furniture away from return air grilles and duct vents, by at least 6 inches, to save energy and help air flow.

Refrigerator and Freezer: Adjust refrigerator temperatures to 35°F to 38°F and set freezer temperatures to 0°F. Keep them indoors and keep the coils clean to save energy.

Water Heater: Set your water heater thermostat to 120°F to save energy and get comfortable hot water for most household uses. About 15% of household energy use goes to heating water.

Laundry: Use cold water to wash all but the most heavily soiled clothes and rinse with cold water while matching the water level to the load size.

Dishwasher: Wash full loads and use the no-heat cycle to dry. A dishwasher can use more energy to dry dishes than it takes to wash them.

Cooking: Instead of an oven, use slow cookers, microwaves, or grills in the summer. Microwaves use up to 80% less energy, cook 75% faster, and produce less heat than ovens.

Blinds/Shades: In the summer, keep window coverings closed during the day to block the sun's heat. In the winter, open to let the sun warm your home.

Phantom Load: Electronics, chargers, and appliances use energy even when they are turned off. Unplug devices when not using.
